

Mobile Web iPhone Shortcut

How to create a *shortcut* on your iPhone home screen to your *Mobile Web*

1.

Navigate To Your Mobile Web Home Page

After launching Safari, type in the web URL of your Mobile Web site in the browser address bar, then press **Go**.

2.

Create a Shortcut

At the bottom of the screen you'll find a **shortcut** icon. Press it.

3.

Select a Menu Option

Once you are presented with this menu, you may **Add a Bookmark**, or **Add to Home Screen**.

4.

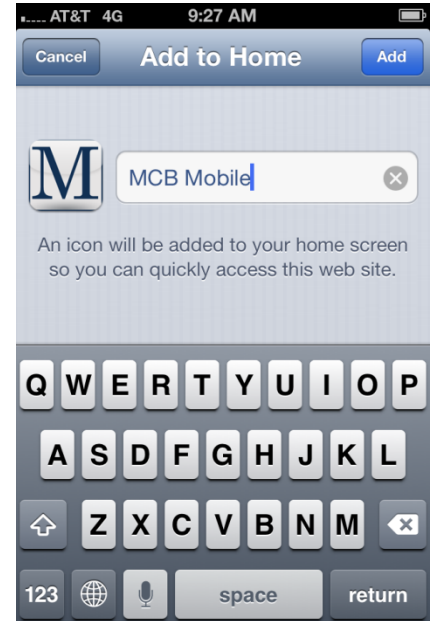

Create a Desktop Icon

To create a home screen icon that links to the Mobile Web site select **Add to Home Screen**.

5.

Give It a Name

Here you have the option to give the home screen shortcut a name. After you type it in, press **Add** at the top of the screen.

Finished!

You now have a home screen icon that is a shortcut to your Mobile Online Banking site.
